PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 1.5+ years of experience delivering production-grade web applications serving 10,000+ monthly active users. Proficient in Node.js, Express.js, Python, React.js, and REST API design with hands-on experience in PostgreSQL and MySQL. Demonstrated ability to build scalable backend systems, implement JWT-based authentication, automate CI/CD pipelines, and collaborate in cross-functional agile teams. Key outcomes: 40% Lighthouse performance improvement, 35% faster page loads, and 60% faster CI/CD cycles across 50+ production sites. Active open-source contributor and community builder.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, PHP, SQL, HTML5, CSS3

Backend: Node.js, Express.js, Flask, Django, REST APIs, WebSockets, JWT, RBAC

Frontend: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, React Native

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS S3, Firebase, Nginx, PM2, Docker (familiar), Git, GitHub, GitLab, CI/CD

AI & Integrations: OpenAI API, LLM integration, Agentic workflows, GitHub Copilot

IoT & Hardware: Raspberry Pi, OpenCV, GPIO, MQTT, Camera Modules

Tools: Figma, Postman, VS Code, SEO Optimization, Agile/Scrum

WORK EXPERIENCE

Full Stack Developer | Gen Z Public Relations Management, Dubai (Remote)

Jul 2025 – Jan 2026 Stack: React.js · Node.js · Express.js · PostgreSQL · JWT · Nginx · PM2

- Architected and deployed a production-ready full-stack news platform serving 10,000+ monthly active users with 99.9% uptime; authored Python utility scripts for data processing.
- Designed scalable RESTful APIs and reusable React components with code splitting and lazy loading, reducing average page load time by 35% and improving Core Web Vitals.
- Implemented JWT-based authentication and RBAC, integrating seamlessly with React frontend, eliminating all unauthorized access incidents post-launch.
- Automated CI/CD pipeline using Git hooks, Nginx reverse proxy, and PM2, cutting release cycle time by 60% and enabling zero-downtime deployments.

Software Developer Intern | CT Group of Institutions, Jalandhar, India

Nov 2024 – Jul 2025 Stack: React.js · HTML5 · CSS3 · JavaScript · PHP · Python · Git · SEO

- Developed and maintained 50+ production websites including enroll.ctgroup.in and ctpublicschool.com, building responsive React frontends and backend logic in PHP and Python.
- Improved average Lighthouse performance scores by 40% through code splitting, image compression, caching strategies, and lazy loading.

- Ensured 99%+ uptime during 15+ high-traffic deployment events, handling 5,000+ concurrent users during admission surges.
- Applied OWASP security best practices — input validation, SQL injection prevention, HTTPS enforcement — achieving zero critical security incidents over 8 months.
- Collaborated with an 8-member cross-functional team to deliver accessible, on-time web solutions.

PROJECTS

SmartGate – IoT Gate Pass & Visitor Management System [\(GitHub\)](#)

- Built a full-stack IoT visitor management system integrating Raspberry Pi, USB/IP camera, and relay-controlled gate mechanism for automated physical access control.
- Implemented real-time face detection using OpenCV on Raspberry Pi, triggering gate open/close via GPIO relay in under 300ms.
- Built a React.js web dashboard for security staff with live camera feed, approval flows, and WebSocket-based real-time logs.
- Used MQTT-based communication between Raspberry Pi hardware and Node.js backend, enabling sub-300ms response for all gate commands.

AI-Powered Code Reviewer [\(GitHub\)](#)

- Built an AI code review tool with Python/Flask backend integrating OpenAI API to analyze quality, detect bugs, and suggest optimizations — reducing manual review time by ~50%.
- Developed a React.js frontend with syntax highlighting and real-time LLM feedback supporting 10+ programming languages.

RescueGrid – AI Disaster Coordination Platform [\(GitHub\)](#)

- Built a real-time disaster coordination system using React, Node.js, and WebSockets with sub-200ms latency for emergency responder management.
- Integrated live mapping APIs and AI-based resource allocation UI for optimized emergency response routing.

menastories.me – Full-Stack News Platform [\(GitHub\)](#)

- Delivered a full-featured news web application with React.js frontend, category filtering, full-text search, and admin CMS panel serving thousands of monthly active users.

EDUCATION

B.Tech – Computer Science Engineering

CT Group of Institutions, Jalandhar, India | 2022 – Present | CGPA: 9.04 / 10.0

LEADERSHIP & COMMUNITY

- Google Student Ambassador: Represented Google technologies on campus, organised 3+ developer events reaching 200+ students.
- President, ByteVerse Community: Founded and led a 100+ member developer community hosting hackathons, workshops, and open-source sprints.
- Mentor & Contributor, OSCI: Mentored 20+ open-source contributors through project selection, code reviews, and PR guidance.
- Project Admin & Contributor, GSSoC (Girl Script Summer of Code): Managed an open-source project with 15+ contributors and reviewed 50+ pull requests.
