

KASHISH SINGH

Jalandhar, Punjab, India | 8707773540 | singhkashish364@gmail.com | github.com/KashishSingh1213

PROFESSIONAL SUMMARY

Innovative and results-driven Full-Stack Developer with expertise in PHP and the MERN stack, dedicated to building scalable and user-centric solutions. As a Google Student Ambassador, Vice President of the ByteVerse Community, and Head of the Coding Club at CT Group of Institutions, I have led major initiatives, including organizing a 500 participant hackathon. Developed CourseHub and enroll.ctgroup.in during internships, and built RescueGrid, an AI powered disaster coordination platform, during a hackathon. Achieved Top 6 at Lovely Professional University Hackathon and Top 10 at Punjab Technical University Hackathon. Seeking to leverage strong technical leadership and modern development skills to drive impactful real-world applications..

EDUCATION

Bachelor of Technology (B.Tech), Computer Science

2022 – Present

CT Group of Institutions, Jalandhar, India | Current CGPA: 8.70

WORK EXPERIENCE

Grizon Tech

January 2026 – Present

AI Architecture Intern (Current)

- Assisting in deployment, monitoring, and scaling of AI inference servers (SGLang/vLLM) to ensure high availability and optimal resource utilization.
- Designing and testing secure FastAPI endpoints to manage efficient routing of user requests between the frontend, MCP layer, and database.
- Evaluating Small Language Models (Qwen 2.5, Llama 3) for latency and accuracy benchmarks in mobile/offline environments.
- Assisting in creation and validation of Ground Truth datasets used to train proprietary Auto-Routing algorithms.
- Conducting adversarial red-teaming and QA testing to identify security vulnerabilities, prompt injections, and logic hallucinations.

CT Group of Institutions

November 2024 –

July 2025

Software Developer (Intern)

- Designed, developed, and maintained 50+ production websites including high-traffic platforms such as enroll.ctgroup.in, ctpublicschool.com, vishalsandal.com, ctgloaleducation.com, and ceeteeworld.com.
- Improved website performance scores by an average of 40% through SEO optimization, image compression, caching strategies, and code splitting across all managed properties.
- Ensured 99%+ uptime during 15+ high-traffic live deployment events, including admission season surges handling 5,000+ concurrent users.
- Implemented OWASP-aligned security best practices including input validation, SQL injection prevention, and HTTPS enforcement, resulting in zero critical security incidents over 8 months.
- Collaborated with cross-functional teams of 8+ members across design, content, and management to deliver responsive, accessible web solutions on time and within scope.

PROJECTS

IoT-Based Smart QR Gate Pass & Visitor Management System

- Engineered a full-stack campus security platform combining a React Native mobile app, React.js admin dashboard, and IoT hardware integration using Raspberry Pi 4 and MQTT protocol.
- Implemented AI-powered face recognition service (dlib/OpenCV) achieving 95%+ accuracy for visitor identity verification at campus entry gates.
- Built microservices architecture with FastAPI including Gate Pass Service, IoT Gateway, Notification Service, and Face Recognition Service backed by PostgreSQL and Redis.
- Developed role-based mobile app for Students, Faculty, Security Staff, and Parents with real-time QR code generation, approval workflows, and live gate monitoring.

Panisha Dhutti – Client Portfolio & Admin Panel <https://www.panishadhutti.com/>

- Designed and developed a professional client portfolio website with a custom-built admin panel for full content management.
- Implemented responsive UI using React.js and Tailwind CSS with SEO optimization, achieving fast load times and high Lighthouse scores.
- Built a secure admin panel enabling the client to independently manage portfolio content, images, and contact submissions.

AI-Powered Code Reviewer <https://github.com/KashishSingh1213/Ai-Code-Reviewer-FrontEnd>

- Built an AI code review tool integrating OpenAI API that analyzes code quality, detects bugs, and suggests optimizations, reducing manual review time by an estimated 50% for test users.
- Developed a clean React.js frontend with syntax highlighting and real-time feedback, supporting 10+ programming languages.

RescueGrid – AI Disaster Coordination Platform https://github.com/KashishSingh1213/Disaster_Management

- Developed a real-time disaster coordination system using React, Node.js, and WebSockets, enabling emergency responders to manage incidents with sub-200ms latency.
- Integrated mapping APIs and AI-based resource allocation logic to optimize emergency response routing.

News Website (menastories.me) <https://github.com/KashishSingh1213/menastories.me>

- Delivered a full-featured news platform serving thousands of users with category filtering, full-text search, and an admin panel for content management.

CouseHub – Course Selling Website <https://github.com/KashishSingh1213/CourseHub>

- Built a full-stack course selling platform enabling instructors to create, manage, and sell online courses with secure payment integration and student enrollment workflows.
- Developed role-based access for admins, instructors, and students with course progress tracking, video delivery, and responsive UI built with React.js and Tailwind CSS.

Library Management System https://github.com/KashishSingh1213/Library_B

- Designed and developed a Library Management System with book inventory tracking, member registration, borrowing and return workflows, and fine calculation features.
- Implemented admin dashboard for managing books, members, and transactions, with search and filter functionality and a secure authentication system.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, HTML5, CSS3, React.js, React Native, Node.js, Express.js, PHP, Basic Python, Tailwind CSS, Bootstrap

Databases: MongoDB, PostgreSQL,

Cloud & DevOps: AWS S3, VPS Hosting, Nginx, Firebase, Git, GitHub, Postman, VS Code, Docker

IoT & Hardware: Raspberry Pi 4, MQTT (Eclipse Mosquitto), OpenCV, FastAPI

Design Tools: Figma, Canva

APIs & Protocols: REST APIs, WebSockets, JWT Authentication

LEADERSHIP & COMMUNITY

- Google Student Ambassador – Represented Google technologies and organized 3+ developer events on campus reaching 200+ students.
- Vice President, ByteVerse Community – Founded and led a 100+ member developer community hosting hackathons, workshops, and open-source sprints.
- Mentor & Contributor, OSCI – Mentored 20+ open-source contributors through project selection, code reviews, and pull request guidance.
- Project Admin & Contributor, GSSoC (Girl Script Summer of Code) – Managed open-source project with 15+ contributors; reviewed 50+ pull requests.
